

High pressure versions TH, FH, BFS, TFS

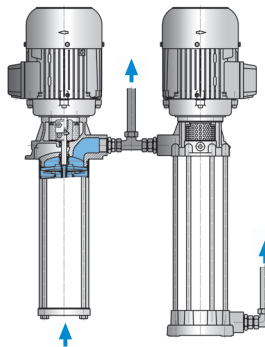

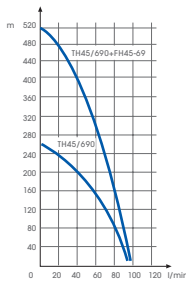

TH serie

Centrifugal coolant pump with frequency converter
pressure range up to 26 bar

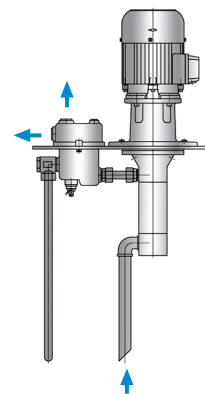

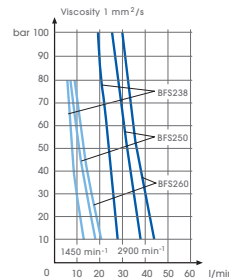

FH serie

foot mounted pressure boosting pump
for pressure boosting in central coolant systems
pressure range up to 52 bar (depends on incoming pressure)

TH, FH serie

tandem with centrifugal coolant pump and pressure boosting pump
example with two pressures
booster pump is available for tank mounting (optional)
pressure range up to 52 bar

BFS, TFS serie

long wearing screw spindle pump
example showing optional pressure-limiting valve and pipes
foot mounted version available in (FFS)
pressure range up to 150 bar
