

# REFLOW

AUTO-RETURN SYSTEM

## ReFlow Footprint

The **REFLOW** system provides the option of having two spare machine mesh swarf baskets and an area for oil drainage.

This automatically returns oil to the machine when a high level is reached.

**Separation:** Baskets are stored in a tray that allows for draining of machine oil.

**Recovery:** Collected oil is pumped back to the machine tank, reducing oil loss.

- Maximum Flow - 30 to 40 Litres / min
- Voltage - 200V / 415V
- Filtration Level - Filter Mesh (Basket)
- Integrated Control Panel -
- Integral Filter Feed Pump -
