

In-line filters

Overview

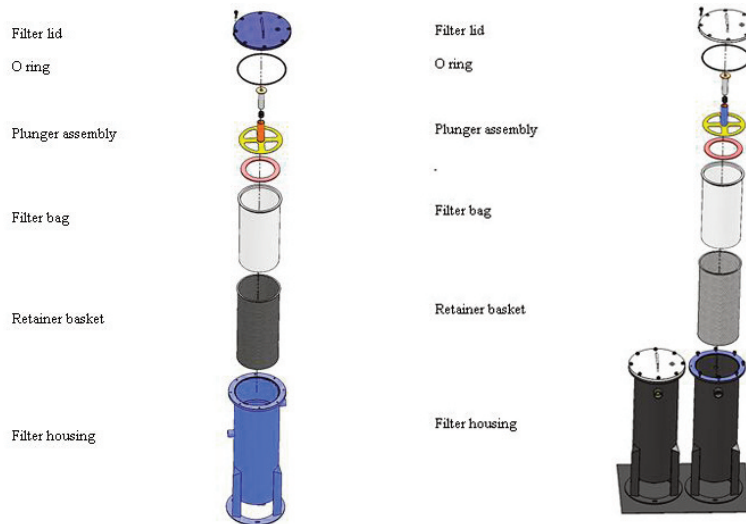

In addition to the Hydra Filter range we can offer in-line strainers, cartridge filters, paper band clarifiers and depth filters from the Losma distributorship. Our machine coolant filters will help prolong the life of your coolant and pumps and result in better lubrication flow, and workpiece surface finish.

Bag type (Hydra Filter)

Hydra Filter is a range of machine coolant filters manufactured with replaceable bag elements.

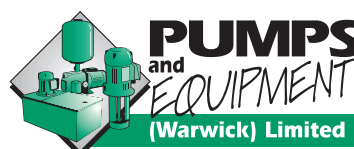

Removable bag filters

- » filtration level
- » 200 down to 5 micron filtering, depending on bag size
